NFT Marketplace

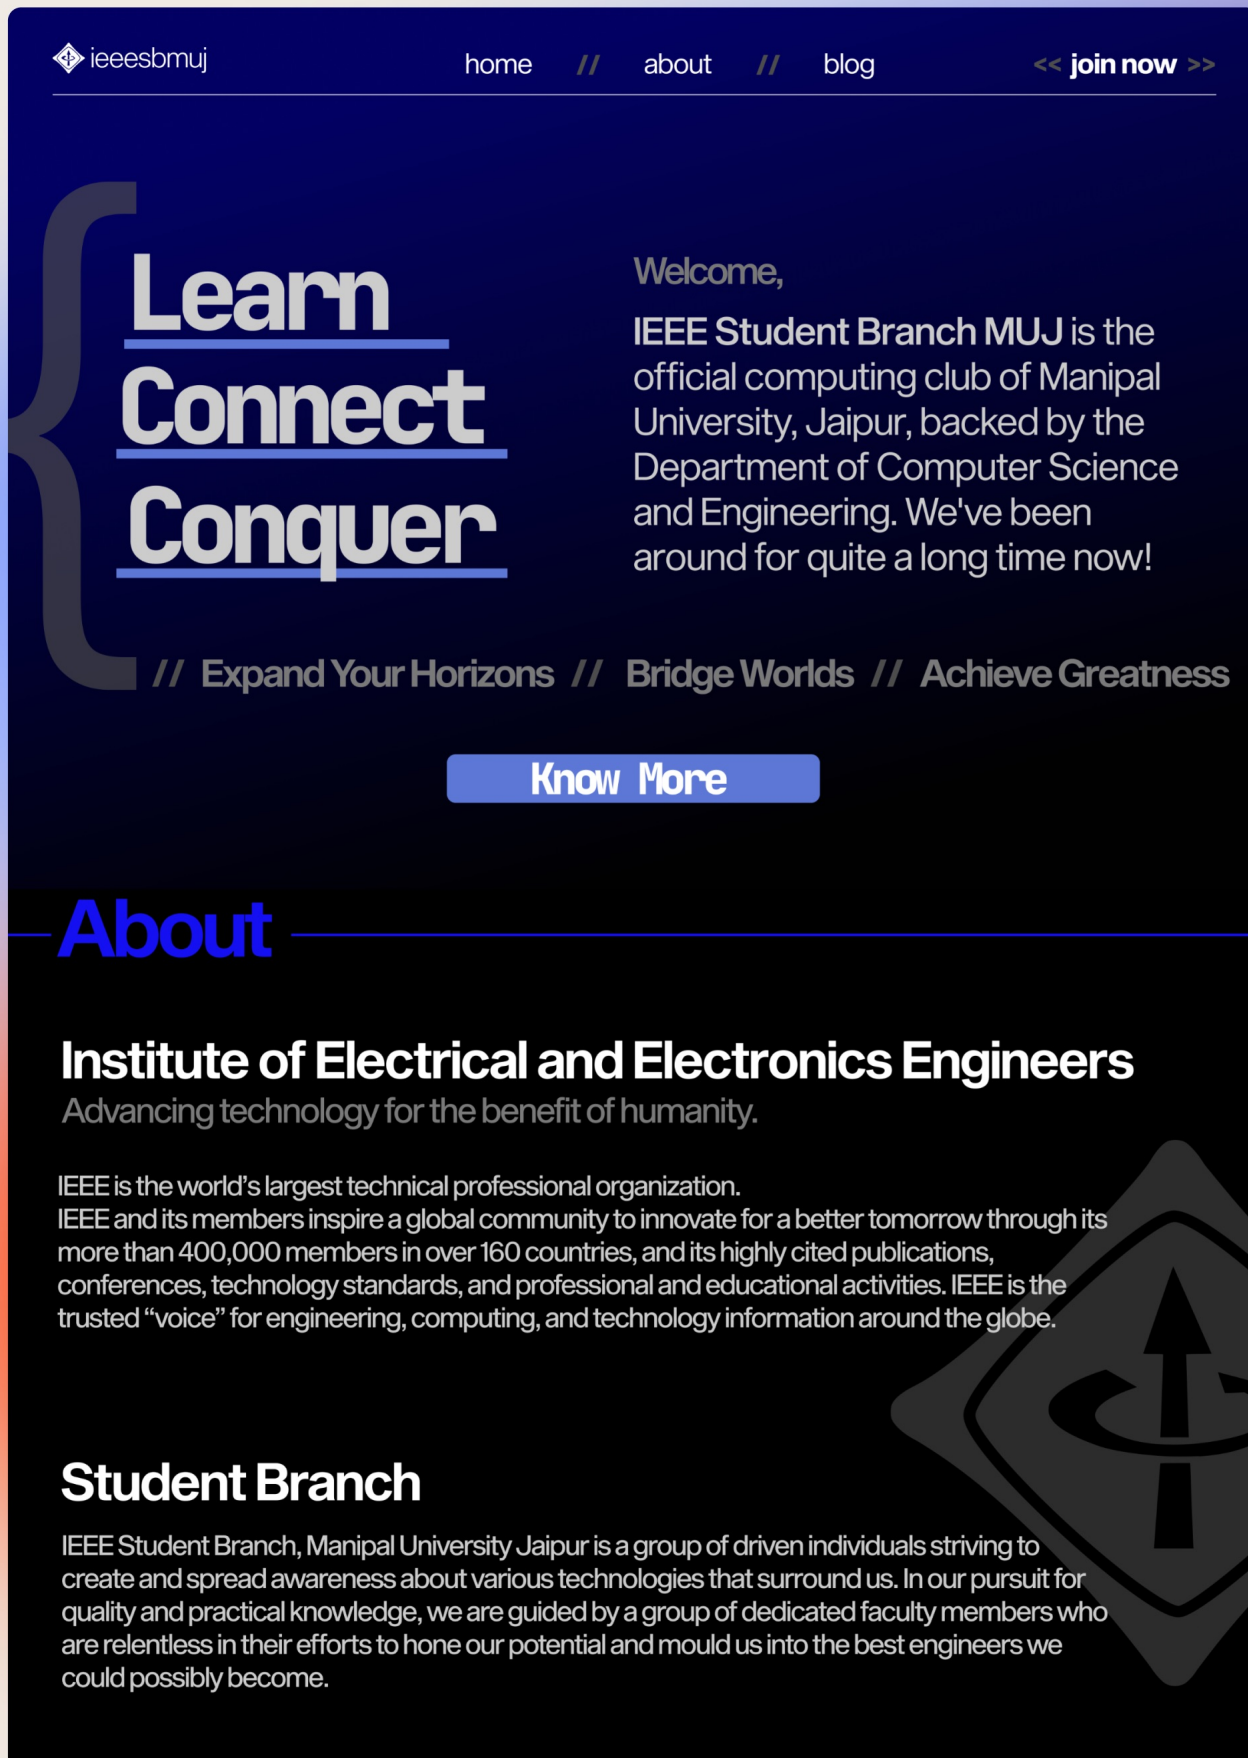

This design was developed for the NFT Marketplace Track of an International Hackathon. It showcases features such as minting NFTs, viewing leaderboards of trending NFTs and creators, and much more.

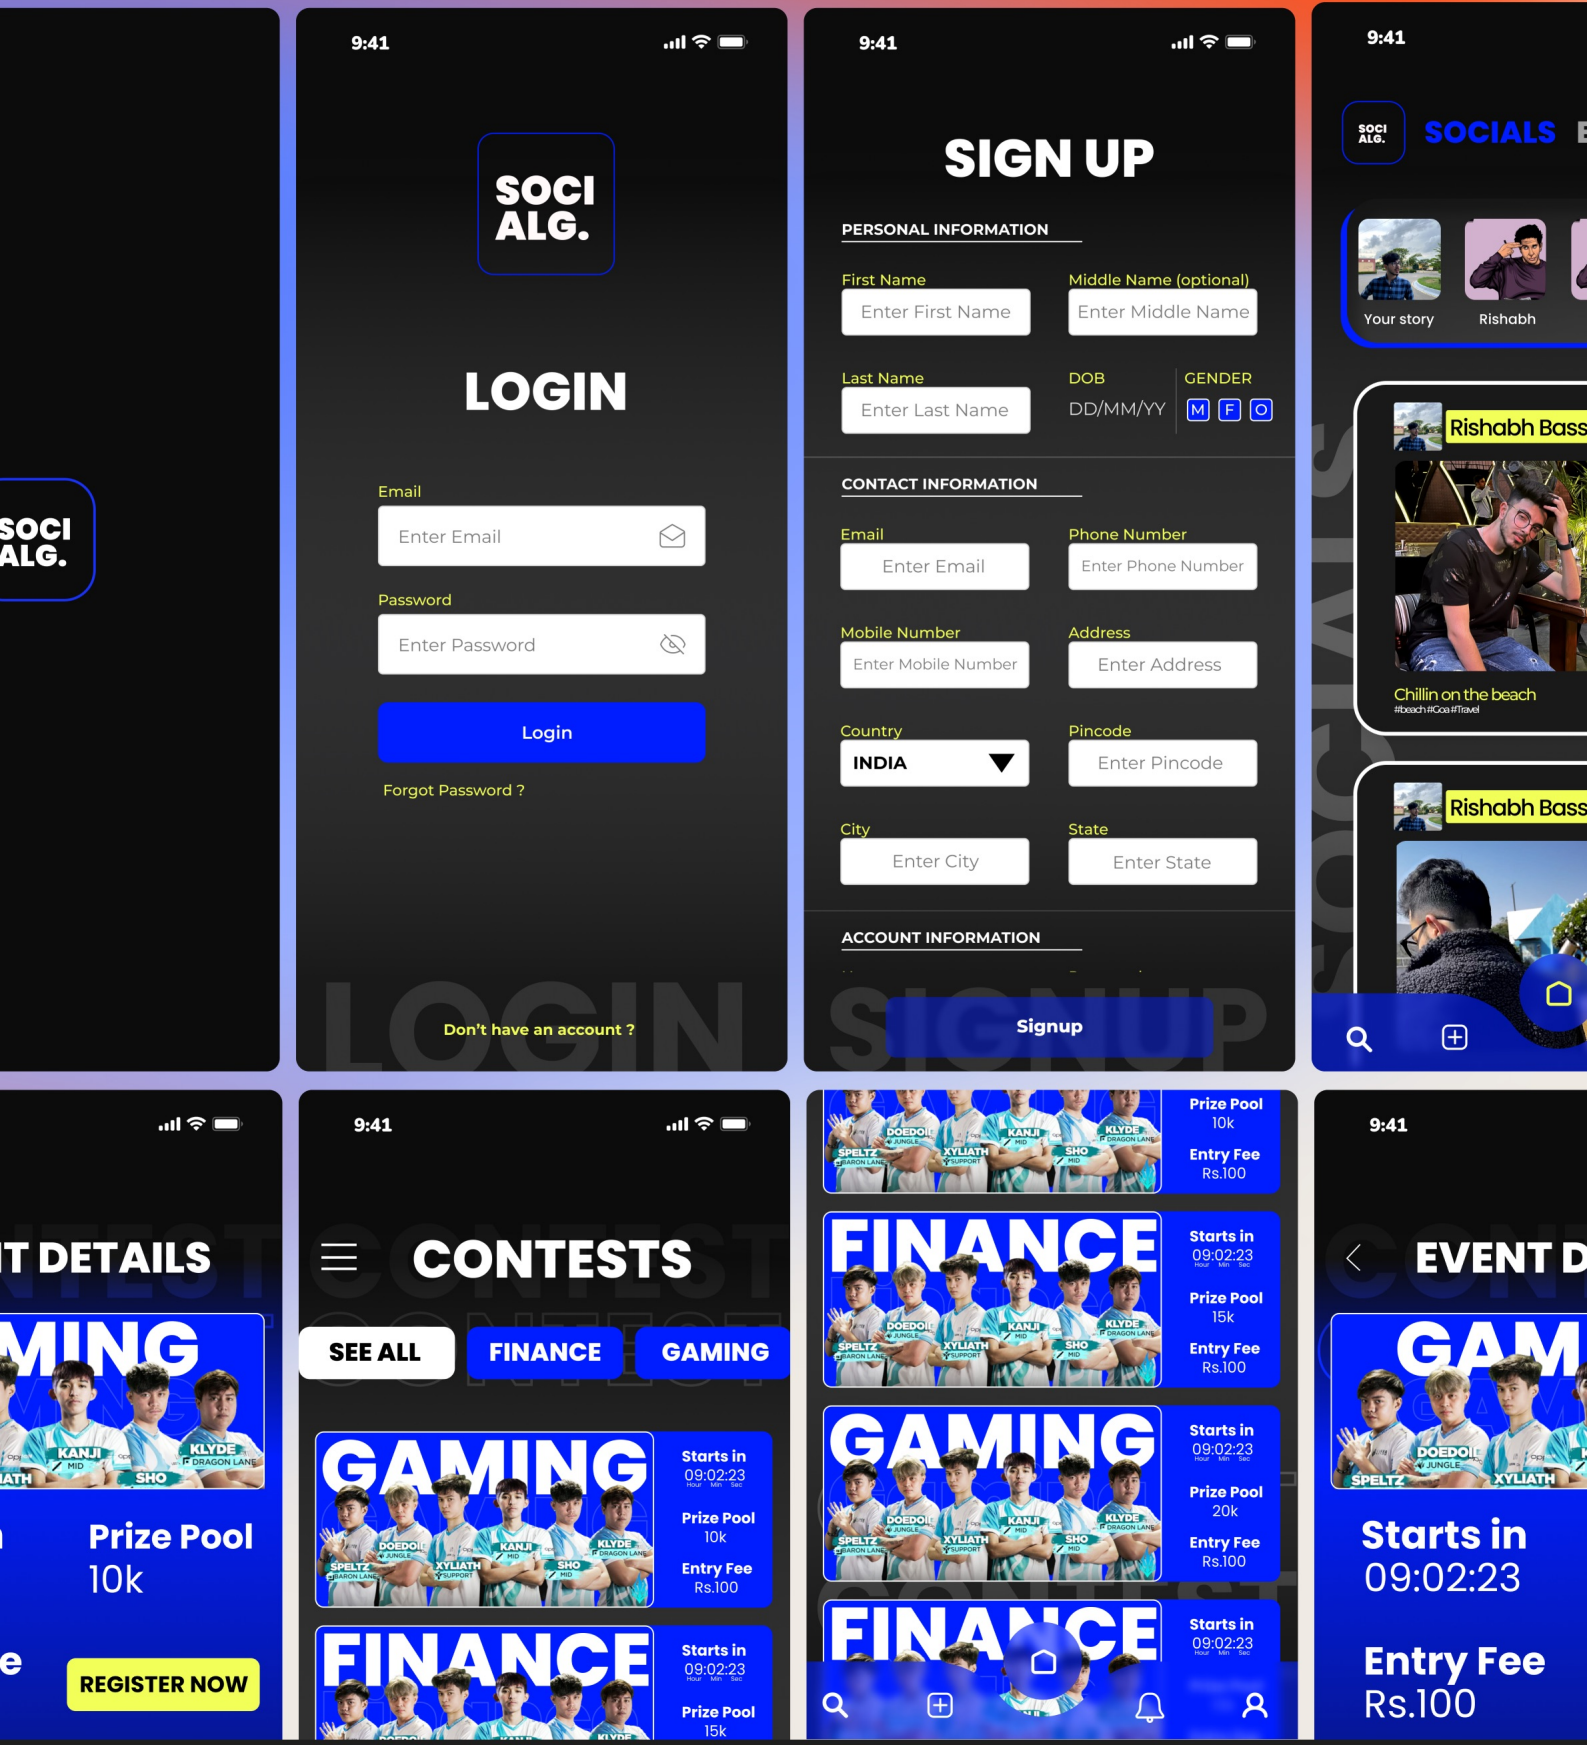

IEEE SB MUJ Website

This design was developed for the renovation and modification of the IEEE SB MUJ website. It features an improved UI and enhanced UX compared to the previous version, showcasing clear and visually appealing information.

Fantasy Gaming App

This design was developed for a startup specializing in fantasy gaming and content creation. The revamped interface offers an engaging and user-friendly experience, tailored to meet the needs of gamers and content creators. Key features include seamless navigation, visually appealing graphics,

EV Station Prediction Website

This design was developed as part of my minor project in the 6th sem and other related features. The project aimed to enhance user interaction, simplifies the navigation and interpretation of geographical data.
